Eyes

When did this issue start?

Have you noticed any redness?

Is there discharge from the eye? If yes, what color is it?

Has your pet been scratching at their face or rubbing it on things?

Is your pet squinting, sneezing, or coughing?

Has there been any trauma or rough housing with other animals?

Is your pet still eating/drinking and acting normally?

Have you been treating at home and is it helping at all?

What medication do you have at home that you have been using?
