Lameness Exam

How long has the lameness been present?

Which leg is the affected?

How severe is the lameness? Will the dog use the leg at all?

Will your pet allow you to touch the leg?

Is your pet having any issues moving around the house?

Was there a trauma that you are aware of?

Is your pet having difficulty going up or down stairs?

Is your pet having difficulty getting up from resting?

Have you given any medications at home to help with the discomfort? If yes, what did you give and what was the effect? When was the last dose given?

How is your pet eating/drinking?

Is there any issue posturing to go to the bathroom?
